SENIOR SOFTWARE DEVELOPER | C# .NET & ERP SPECIALIST

Accomplished Senior Software Developer with over 18 years of experience designing, coding, and delivering high-impact solutions using the .NET ecosystem (C#, ASP.NET, Blazor, MAUI) and SQL databases. Passionate about writing clean, performant, and maintainable code, with a proven track record in modernizing legacy systems, automating critical business processes, and building scalable, event-driven architectures. Deep expertise in backend development and complex platform integration, including specialization in SAP Business One and S/4HANA. Additional background leading development teams, though my primary focus has always been **hands-on technical delivery and code quality**.

TECHNICAL SKILLS

- Languages & Frameworks:** C#, .NET Core/.NET 5+, ASP.NET, Blazor, MAUI, LINQ, Entity Framework Core, SignalR
- Architecture & Cloud:** RESTful API Design, Event-Driven Architecture, Microservices, Docker, Redis
- ERP & Integration Platforms:** SAP Business One (UI API, DI API, Service Layer), SAP S/4HANA
- Databases:** PostgreSQL, Microsoft SQL Server (2005-2022), SAP HANA (SQL Script), T-SQL, Stored Procedure Optimization
- Tools & Concepts:** Git, Visual Studio, Ubuntu Server, Agile/Scrum, OOP, Design Patterns, Clean Code

PROFESSIONAL EXPERIENCE

Full Stack C# Developer | SaaS Customer Service Platform | Remote Jan 2024 - Present

- Lead developer building real-time features for a multi-tenant SaaS platform using **Blazor** and a **.NET** backend, enhancing customer engagement and reducing response times.
- Engineered scalable, low-latency communication using **SignalR** and **Redis**, reliably handling thousands of concurrent user connections.
- Wrote and optimized complex queries on a normalized **PostgreSQL** database, improving data retrieval performance for mission-critical features.

- Managed full Linux server administration, deploying and orchestrating containerized microservices using ****Docker**** on Ubuntu, ensuring 99.9% uptime.

Senior C#/.NET Developer (SAP B1 Specialist) | Invent Software | Goiânia, GO

Nov 2023 - Oct 2024

- Worked as a Senior Developer / Level 3 Architect on the TaxPlus fiscal add-on, evolving complex tax modules based on client requests and changing state and federal regulations.
- Delivered client-specific improvements and parameterized features, including FCI (Import Content Statement) scenarios.
- Contributed to the development of SPED Fiscal Block K.
- Optimized C#/.NET algorithms and SQL providers for SQL Server and SAP HANA, improving performance and reducing tax-processing time.
- Supported code reviews for junior and mid-level developers, helping maintain technical consistency and delivery quality.

Development Manager & Technical Lead | Atacadão Dia a Dia | Goiânia, GO

May 2022 - Sep 2023

- Directed the technical strategy and development team for a major SAP S/4HANA migration, translating business requirements into robust, scalable technical designs.
- Mentored a team of developers, fostering a culture of technical excellence and aligning deliverables with strategic business goals for the ERP transformation.
- Collaborated with senior leadership to define the systems roadmap, prioritizing .NET-based integration points between S/4HANA and legacy retail operations.

Development Manager | H&CO | Goiânia, GO

Aug 2021 - May 2022

- Led and mentored cross-functional C# development teams, managing resource allocation and project delivery for multiple concurrent SAP B1 integration projects.
- Defined and enforced best practices for API development using the SAP DI API and Service Layer, creating clean, maintainable interfaces between SAP B1 and third-party logistics systems.
- Successfully de-escalated critical client issues by restructuring project priorities and implementing rigorous code review processes.

SAP B1 Developer Manager | Run Sistemas | Goiânia, GO

2016 - Aug 2021

- Built and led a high-performing team of developers from the ground up to design, build, and maintain a suite of custom SAP Business One add-ons.
- Transitioned the team from monolithic, UI-API-bound add-ons to a decoupled, service-oriented approach using the Service Layer, improving system stability and upgrade compatibility.
- Oversaw the full SDLC for multiple major products, dramatically improving warehouse and financial process automation for clients.

Senior SAP Developer / Team Lead | Invent Software | Goiânia, GO

2013 - 2016

- Promoted from Developer to Team Lead, taking ownership of a portfolio of custom solutions requiring advanced C#, .NET, and SQL Server development.
- Designed and reviewed critical architecture for ERP integrations, ensuring performance and reliability for data-intensive client operations.

Systems Analyst & C# .NET Developer | Milênio Distribuidora | Goiânia, GO

Jun 2007 - Jan 2013

- Engineered a dynamic, role-based reporting engine using C# .NET and T-SQL, fully integrated with SAP B1, which was adopted as the company-wide standard.
- Automated the end-to-end process for electronic fiscal document issuance (CT-e, MDF-e), ensuring 100% legal compliance and eliminating manual data entry hours.
- Developed a high-throughput financial automation solution to validate electronic bank billing files (remittance, return), eliminating manual reconciliation errors for monthly transactions.

EDUCATION

FASAM

Completed 3 semesters — coursework finished, thesis pending

Universidade Salgado de Oliveira

2003/2 - 2007/1

EARLY CAREER

IT Assistant | Milênio Distribuidora | Goiânia, GO

Jun 2006 - Jun 2007

IT Intern | Goiás Caminhões e Ônibus Ltda | Goiânia, GO

2004 - 2005

- Provided user support and assisted with development in Delphi and database maintenance.

KEY PROJECTS & ACHIEVEMENTS

- ****Dynamic Reporting Engine:**** Designed and implemented a fully integrated managerial reporting tool that became the company's official standard, featuring role-based user access controls.
- ****Fiscal Automation:**** Created add-ons for electronic tax document issuance (CT-e, MDF-e), ensuring legal compliance and automating complex manual processes.
- ****Financial Automation:**** Developed robust solutions for validating electronic bank billing files (remittance, return, and boleto), eliminating manual errors and increasing operational efficiency.
